

BERLIN

UNITED ALABASTER

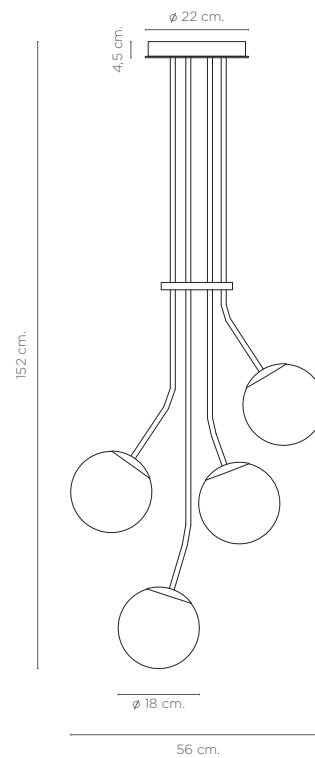

BERLIN 20-8648/4

Ceiling lamp

With the Berlin collection the concepts have been updated by using alabaster as a diffusing material of light. They are the protagonists in lounges, bedrooms or dining-rooms. This collection is perfect to be installed in much more modern and minimalist designs, being the latest fashion in design and interior design, Luminaires that emit a nice ambient light without high contrasts of light and shadow when they decorate any space.
